

Vender Fee Disclosure

CPS collects and retains administrative fees from its vendors based on Member's purchases ("GPO fees"). Most GPO fees equal three percent (3%) or less of a member's purchases. In accordance with safe harbors regulations, below is a list of GPO fees that exceed three percent (3%) of a member's purchases with any individual vendor.

Note that a member's purchases may not lead to a GPO fee in excess of 3% even though the purchases are for products and services from vendors on this list. Some fees listed below only exceed 3% if certain conditions are met, including whether volume thresholds are met, the purchase is of certain products, and various other vendor-specific terms and conditions.

Note also that certain purchases may lead to more than one GPO vendor's services, for example, a distributor and manufacturer of a certain product, and that collectively the GPO fees associated with such a purchase may exceed 3%. Such arrangements are not included below.

Administrative Services

Bank of America	4%
Brand Advantage Group	4%
