

# Increase older adult engagement, health and happiness through active singing - this group activity has it all!

**SingFit PRIME** is an interactive, turnkey therapeutic singing program for long term care staff to easily engage their residents in groups.

## Residents Come Alive

With hundreds of songs from the 1920s to the 2000s, SingFit PRIME captivates even the most difficult to reach residents: “Residents who hardly talk will sing along to songs with SingFit! If a resident is agitated, SingFit can calm them.”

## Unlimited Online Training

Concerned about staff turnover? Don't be! 92% of SingFit facilitators report improved job satisfaction. Additionally, with SingFit PRIME's online training, you can get current or new staff trained at a time that fits their schedule.

## Designed by Music Therapists

The PRIME scripted booklets include music, trivia, movements and more! Our board-certified music therapists design new booklets every quarter so in-house staff can run consistent therapeutic music sessions on a regular basis.

## Benefits Supported By Science

SingFit is based on research proving the benefits of singing for improving mood, cognitive health, and socialization, while decreasing agitation, wandering, and anti-anxiety medication usage. More at [SingFit.com/science](http://SingFit.com/science)
